To my father. Your love for books was truly inspiring. You will always remain in our hearts

Packt.com

Subscribe to our online digital library for full access to over 7,000 books and videos, as well as industry leading tools to help you plan your personal development and advance your career. For more information, please visit our website.

Why subscribe?

- Spend less time learning and more time coding with practical eBooks and Videos from over 4,000 industry professionals
- Improve your learning with Skill Plans built especially for you
- Get a free eBook or video every month
- Fully searchable for easy access to vital information
- Copy and paste, print, and bookmark content

Did you know that Packt offers eBook versions of every book published, with PDF and ePub files available? You can upgrade to the eBook version at www.packt.com and as a print book customer, you are entitled to a discount on the eBook copy. Get in touch with us at customercare@packtpub.com for more details.

At www.packt.com, you can also read a collection of free technical articles, sign up for a range of free newsletters, and receive exclusive discounts and offers on Packt books and eBooks.

About the author

Eryk Lewinson received his master's degree in quantitative finance from Erasmus University Rotterdam (EUR). In his professional career, he gained experience in the practical application of data science methods while working for two "Big 4" companies and a Dutch FinTech scale-up. In his work, he focuses on using machine learning to provide business value to his company. In his spare time, he enjoys writing about topics related to data science, playing video games, and traveling with his girlfriend.

Writing this book was quite a journey for me and I learned a lot during it, both in terms of knowledge and about myself. However, it was not easy, as life showed a considerable number of obstacles. Thankfully, with the help of the people closest to me, I managed to overcome them. I would like to thank my family for always being there for me, my brother for his patience and constructive feedback at random times of the day and night, my girlfriend for her undeterred support and making me believe in myself. I also greatly appreciate all the kind words of encouragement from my friends and colleagues. Without all of you, completing this book would not have been possible. Thank you.

About the reviewers

Ratanlal Mahanta is currently working as a Managing Partner at bittQsrv, a global quantitative research company offering quant models for its investors. He has several years' experience in the modeling and simulation of quantitative trading. Ratanlal holds a master's degree in science in computational finance, and his research areas include quant trading, optimal execution, and high-frequency trading. He has over 9 years' work experience in the finance industry, and is gifted at solving difficult problems that lie at the intersection of the market, technology, research, and design.

Jiri Pik is an artificial intelligence architect and strategist who works with major investment banks, hedge funds, and other players. He has architected and delivered breakthrough trading, portfolio, and risk management systems, as well as decision support systems, across numerous industries.

Jiri's consulting firm, Jiri Pik – RocketEdge, provides its clients with certified expertise, judgment, and execution at the drop of a hat.

Packt is searching for authors like you

If you're interested in becoming an author for Packt, please visit authors.packtpub.com and apply today. We have worked with thousands of developers and tech professionals, just like you, to help them share their insight with the global tech community. You can make a general application, apply for a specific hot topic that we are recruiting an author for, or submit your own idea.
